PROFESSIONAL EXPERIENCE

AGILE Infoways Pvt. Ltd   Ahmedabad
Software Developer   March 2023 – Present

- My role involves seeing the development and deployment of mobile app, as well as providing assistance to junior colleagues in troubleshooting.

Silversky Technology   Ahmedabad
React Native Developer   February 2021 – March 2023

- My role encompasses the development and deployment of small to mid-level mobile applications for both Android and iOS platforms.

PROJECTS

RRR (Rock Road Rabbi)

- "Rock Road Rabbi" is a tourist guide agency specializing in tour packages for Israel. The accompanying app offers premium subscriptions for access to its features. Users can explore their selected country's tourist destinations upon purchase or through provided credentials.
- My roles in the "Rock Road Rabbi" app include building the chat, resource, and subscription features, as well as mentoring the map module development.
- Available on: - [Play store](#) & [App Store](#)

Number Dekho

- "Number Dekho" is an app combining Urban company like instant service. I work on the vendor and customer app both, vendor app that enabling vendors to accept and manage service requests, payments and records where customer app that enabling a user to book and monitor and make payments their booked services.
- My roles in the "Number Dekho" apps include building Ui and Api integration along with socket implementation and deployed on store as well.
- Available on: - [Play store](#) & [App Store](#) (Vendor App) , [Play store](#) & [App Store](#) (Customer App)

Dorm Shine

- "Dorm Shine" is a mobile app designed to help university students effortlessly manage their dorm life by providing cleaning, maintenance, and organization services. With features such as scheduled services based on their availability
- My roles in the "Dorm Shine" app include building the chat, resource, profile, booking, payment features and deployed on store as well.

CMM

- **"CMM"** is a Tinder-like mobile app designed for social connections, offering phone number, Facebook, and Google logins, real-time chat, and in-app purchases for premium features.
- My roles in the **"CMM"** app include building social authentication, chat, in-app purchase integration, and handling deployment on the app stores.

QuickPOD

- "QuickPOD" is a mobile app designed for where users capture delivery proof through PDF images, streamlining documentation. With seamless API integration, images are swiftly uploaded to the server. Users effortlessly track upload status and benefit from automatic retries for failed uploads every 10 minutes, ensuring reliable data transmission.
- My roles in the app include building Ui and Api integration part.
